PROFESSIONAL SUMMARY

AI ML focused Computer Science graduate with a strong foundation in Machine Learning (ML), Generative AI, data analytics, and intelligent systems. Experienced in building AI powered applications, developing and evaluating machine learning models, and applying data driven solutions to solve real world business problems. Skilled in cross functional collaboration, model deployment, and translating technical results into measurable business impact. Passionate about learning emerging technologies and delivering practical, scalable AI solutions.

EDUCATION

Vellore Institute of Technology (VIT)

B.Tech in Computer Science with Minors in Artificial Intelligence & Robotics, CGPA: 7.92

Chennai, Tamil Nadu

2022 – 2026

TECHNICAL SKILLS

Programming: Python, SQL

Machine Learning: NumPy, Pandas, Scikit-learn, Supervised & Unsupervised Learning, Neural Networks, Classification & Regression, Explainable AI (XAI)

Generative AI: Large Language Models (LLMs), Retrieval-Augmented Generation (RAG), LangChain, Vector Databases, Embeddings, Prompt Engineering

Databases: MySQL, MongoDB, SQLite, Pinecone

Cloud & Tools: Amazon Web Services (AWS), Oracle Cloud Infrastructure (OCI), Git, Docker, Postman

PROJECTS

Temporal Motif Aware Fraud Detection System [Live Demo](#)

[GitHub](#)

Python, Graph Neural Networks, XGBoost, SHAP, Pinecone

- Engineered an end to end fraud detection pipeline on **500K+** transactions from the IEEE CIS dataset, combining Graph Neural Network (GNN) embeddings with XGBoost to improve detection accuracy by **25%** over baseline models.
- Applied SHAP for explainable, per transaction fraud predictions and indexed graph embeddings in a Pinecone vector database, enabling sub second similarity search across historical transactions.

Xeno Analytics Platform [Live Demo](#)

[GitHub](#)

Python, Random Forest, K-Means, Node.js, MongoDB

- Built and deployed a Random Forest sales forecasting model and a K Means customer segmentation model for merchants, driving data driven inventory planning and targeted marketing strategies.
- Benchmarked multiple machine learning models on live transaction data and deployed top performing models to production, delivering real time analytics through a Node.js and MongoDB backend.

Sleep Oracle: Health & Lifestyle Prediction System [Live Demo](#)

[GitHub](#)

Python, Scikit-learn, Flask, Pandas

- Trained and validated a Random Forest classifier on **400+** patient records across **13** health features, selected for the best Precision, Recall, and F1 score among all models evaluated.
- Deployed the model as a Flask web application, enabling real time sleep disorder risk prediction for end users.

TECHNICAL CONTRIBUTION

Open Source

Contributor – AMD Lemonade SDK [GitHub](#)

Jan 2026 – Present

- Contributed to AMD's open source AI inference server, covering backend improvements, documentation, and manually identifying and resolving multiple backend and test coverage bugs.
- Bugs Identified: [Issues](#)
- Merged PRs: [Pull Requests](#)

Workshop

Generative AI Trainee -- SmartBridge [Live Demo](#)

May 2025 – Jul 2025

- Developed QueryCraft, an AI powered Text to SQL platform on Google Cloud, leading prompt engineering and schema grounding efforts that improved SQL generation accuracy by **30%**, and evaluated the NLP pipeline across enterprise database schemas.
- [Certificate](#) | [Project Certificate](#)

CERTIFICATIONS

Oracle Cloud Infrastructure 2025 Certified Data Science Professional
