# KUSHAL CHOUDHARY

**Junior Python Backend Developer | Applied AI**

Gurugram, India | +91 8619299156 | kushalchoudhary1213@gmail.com | LinkedIn | GitHub | Portfolio

## TECHNICAL SKILLS

**Backend:** Python, FastAPI, Flask, Node.js, Express, REST APIs, SQL, MySQL, MongoDB
**AI and ML:** Generative AI, LLMs, retrieval-augmented generation (RAG), LangChain, FAISS
**Data and web:** scikit-learn, pandas, NumPy, JavaScript, React
**Cloud and tools:** Google Cloud, AWS EC2, Oracle Cloud Infrastructure (OCI), Git, Docker, Postman

## EXPERIENCE

**AI Intern | DarwixAI | Sep 2026 - Present**

- Contribute to the development of AI voice agents for banking, financial services and insurance clients.

**Generative AI Intern | SmartBridge | May 2025 - Jul 2025**

- Built REST API microservices for QueryCraft, a natural-language-to-SQL application.
- Used schema grounding on Google Cloud and validated generated SQL against 5+ enterprise database schemas.

Internship certificate | Project certificate

## PROJECTS

**Veyra | Multi-Agent Voice AI Platform | GitHub**

- Built FastAPI services that ingest PDFs, web pages and text. Used FAISS and Gemini to answer voice queries with citations to source documents.
- Connected a React dashboard to an Express and Socket.IO gateway to stream live transcripts.
- Tested whether the agent cites supporting sources and declines queries about unpublished or unsupported content.

**Xeno Analytics | Shopify Data Pipeline | GitHub | Demo**

- Built a Python ETL pipeline for Shopify merchant data to support sales forecasting and customer segmentation.
- Used Random Forest for forecasting and K-means for segmentation.
- Exposed analytics through Node.js and MongoDB services and tested the REST APIs in Postman.

**Sleep Oracle | Full-Stack ML Application | GitHub | Demo**

- Preprocessed 400+ records across 13 health and lifestyle features using pandas and NumPy.
- Compared sleep disorder classifiers using precision, recall and F1.
- Served Random Forest predictions to a React frontend through a Flask API packaged with Docker.

## RESEARCH AND PUBLICATIONS

**Temporal Motif-Aware Fraud Detection System | IJRTI publication | GitHub**

- Modeled 500K+ IEEE-CIS transactions as graphs and combined temporal graph embeddings with XGBoost.
- Used SHAP to identify the features driving individual fraud predictions.

## OPEN SOURCE CONTRIBUTIONS

**AMD Lemonade AI | Pull requests | Issues**

- Improved inference server API error handling through merged pull requests.
- Wrote a LangChain integration guide for calling the inference server REST API.

## EDUCATION

**Vellore Institute of Technology, Chennai | 2022 - 2026**

B.Tech, Computer Science and Engineering | CGPA: 7.92/10 | Minors: AI and Robotics

## CERTIFICATIONS AND TRAINING

OCI 2025 Certified Data Science Professional | View credential
OCI Generative AI Professional | View credential
OCI AI Foundations Associate | View credential
Oracle Agentic AI Certified Foundations Associate | View credential
Google Cloud Skills Boost - Generative AI Learning Path | View credential
